Mrs. Powers Reported as 'Satisfactory'

ALEXANDRIA — Mrs. Francis Gary Powers, 27, wife of the U-2 spy pilot, was reported in "satisfactory condition and eating well" at Georgetown Hospital today.

A hospital spokesman said, however, that it was not known when Mrs. Powers would be released from the hospital.

"The doctors are still conducting tests," the spokesman said.

MRS. POWERS was admitted to the hospital Friday morning after being transferred from Alexandria Hospital.

The Georgetown Hospital reported then that Mrs. Powers was suffering from acute indigestion. A Washington Police report indicated that Mrs. Powers had taken about 28 sleeping pills, but there was no further explanation of the incident.

Mr. and Mrs. Powers have been living at Hunting Towers Apartments for several weeks. Powers is still working for the Central Intelligence Agency.
